UNLOCKING LEARNING IN PANDEMIC

Virtual Learning in COVID-19 Pandemic

What is this about?

Hello there!

Welcome to our exciting adventure of learning online at a time when big germs, called COVID-19, made it tricky to go to school. Just like how you sometimes can't go outside to play with friends when you're feeling under the weather, students all around the world have to stay home to stay safe from these sneezy germs.

Now, let's imagine a young friend, Leo. Leo loved going to school and playing with her classmates. But one day, he couldn't go because of the tricky germs. So, Leo's teacher said, "Don't worry, we can still learn and have fun together online!"

Leo and his friends got to see each other on the computer screen, just like a big video game. They could talk, share stories, and even do fun activities, all from the safety of their homes.

And that's what we're here to talk about – how students like Leo found amazing ways to keep learning and having fun, even when they couldn't be in their classrooms. So, let's start our journey into the world of virtual learning and see what exciting things we discover!

Note: The report is prepared in group, by : Sandesh Subedi, Sandesh Giri, Nabin Chhetri, and Suraj Pandey
